## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The examiner does not understand what is meant by a "controller". Does the applicant mean to claim that the controller controls the formation of the polymer or the etch speed?

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 27-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Vahedi et al. (US 2003/0148224). Vahedi et al. disclose providing an integrated circuit device having a substrate and a material layer above the substrate, forming a patterned

photoresist layer including at least one opening therein above the material layer; and etching the material layer while protecting the photoresist layer from etching by exposing the integrated circuit device to a mixture including an etchant and a controller (paragraphs 0059- 0068). With regards to claim 28 Vahedi et al. disclose the etchant to be a gas. With regards to claim 29 Vahedi et al. disclose the etchant contains fluorocarbon gas and that there is oxygen used in the process. With regards to claim 30 Vahedi et al. disclose forming a polymer layer on the photoresist layer (figure 5). With regards to claim 31, the examiner takes official notice that it well know to control the flow rate of any gas or liquid substance (valves and flow rate controllers and the use of them is very well known in the art). With regards to claim 32 Vahedi et al. disclose the use of  $C_xH_yF_z$  (0064).

### ***Allowable Subject Matter***

Claims 1-26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art neither teaches nor suggests within the context of the entire claim partial etching the ARC layer defined by the at least one opening and subsequently forming a polymer layer on the inside of the at least one opening.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
